Sorina Livia Mărgineanu, email: [sorinamargineanu@yahoo.com](mailto:sorinamargineanu@yahoo.com)

### STANDARD

- ✓ The database was conceived according to standard procedures
- ✓ We will continue to add and manage new data
- ✓ We will backup all the registered data periodically
- ✓ We made all the diligence searched to complete the database with new information
- ✓ We tried to identify as many as possible local producers of natural juices, canned vegetables, wine and beer producers

### DIFFICULT

Because we did not use the anonymization of the respondents when collecting data:

- Poor willingness to communicate
- Chances to provide inaccurate data
- A lot of work to ensure that the companies asked for data understand what we want to do with their answers (meaning data) in order to deliver the real facts
- Less companies responding

We managed this project being strongly convinced of the importance of relevant databases in current agriculture and in correct waste management.

**Our activity within the project, which was to build, operate and secure the database information concerning the agro-industrial wastes produced in the cross-border area of Romania**
